Location:
Mirpur-12, Dhaka - 1216

TECHNICAL SKILLS

Programming:
Python, Kotlin, HTML, CSS, JavaScript

Tools & DB:
MySQL, Room DB, Ktor, Git, Android Studio, VS Code

OS:
Linux (Ubuntu), Android, Windows, iOS

EXPERT FIELDS

- App Development
- Web Development
- AI / Machine Learning
- Computer Vision
- Cyber Security
- IoT Systems

LANGUAGES

- Bengali (Native)
- English (Fluent)
- Hindi (Conversational)

CERTIFICATIONS

AWS Cloud
Online Course Completion Certificate

KAMRUL HASAN RIYAD

CIS Engineer / Software Developer

CAREER OBJECTIVE

Highly motivated Software Engineering postgraduate with a strong passion for Artificial Intelligence, Machine Learning, website development, cyber security analysis, and app development. I am planning to apply to a Master/Research program where I can acquire advanced research skills in AI-based solutions, intelligent automation, secure web/mobile systems, and applied machine learning to solve real-world problems.

EDUCATION

Daffodil International University 2022 – 2026
B.Sc. in Computing and Information System
Relevant Coursework: Artificial Intelligence, Machine Learning, Cyber Security Analysis, Data Structures & Algorithms, OOP, DBMS, SQA, Operating Systems, Computer Networks.

Monipur High School and College 2018 – 2020
HSC (Science) — GPA 4.92 / 5.00

Sultan Mollah Adarsha High School 2016 – 2018
SSC (Science) — GPA 4.78 / 5.00

PROJECTS

- **Arrow Escape Master:** Developed a logic puzzle game centered around arrow-unblocking mechanics, challenging players to clear tile states.
- **Puzzle Pals:** Created an educational children's puzzle game featuring animal levels with interactive animal sounds and descriptions.
- **Little Arcade:** Built a fun web arcade platform with classic mini-games including a guessing game, quick math, and Rock-Paper-Scissors.
- **Serverless QR Code Ordering System:** Engineered an offline, local Wi-Fi-based restaurant ordering and admin system with embedded Ktor.
- **Tong (POS & Due Management App):** Developed an Android application for local shop customers to calculate prices and track due balances.
- **Cooking Assistant App:** Created a step-by-step culinary guide app assisting users in cooking various authentic recipes.
- **Third Eye AI Sign Language Recognition:** Built a computer vision system in Python/TensorFlow interpreting sign language in real time.
- **Smart Car (IoT Autonomous Vehicle):** Designed an IoT prototype for an autonomous vehicle using sensors for navigation and obstacle avoidance.
- **Dynamic Portfolio Website:** Deployed a responsive, dynamic personal portfolio website to showcase technical projects and skills.
